👤 SUMMARY

Python Backend Developer with 2+ years of experience building high-load systems and large-scale integrations. Experienced in FastAPI and RESTful services, designing scalable architectures and asynchronous processing pipelines. Contributed to nationwide logistics and fiscal systems handling high daily throughput.

🔌 KEY MODULES & BUSINESS DOMAINS

- Fiscalization (Receipt Processing)
- Payment Orchestration
- OMS (Order Management)
- ERP System Integrations
- WMS (Warehouse Management)
- CRM (Customer Data Management)
- API for Partner Integrations
- High-Volume Transaction Processing
- Asynchronous Event-Driven Processing
- Client Verification

★ PROJECTS

- **E-commerce & Order Management Systems.** Designed and developed backend systems supporting the full order and customer lifecycle for national-scale e-commerce platforms. Implemented order processing, customer data management, ERP integrations, and automated shipment workflows.
- **Fiscal & Payment Systems.** Developed high-load fiscalization and payment orchestration systems. Implemented online/offline fiscalization, receipt lifecycle management, and event-driven processing with Kafka, Celery, Redis, and PostgreSQL.
- **Logistics & Warehouse Systems.** Designed WMS and Pick-Up/Drop-Off management systems automating inventory tracking, cargo lifecycle management, and client verification across logistics operations.
- **Government & National Program Integrations.** Implemented backend integrations for nationwide initiatives, supporting secure data exchange, high-load beneficiary processing, and large-scale logistics coordination.

🏢 WORK HISTORY

- **Software Developer at JSC Ukrposhta, Kyiv**
Jul 2023 — Present
 - Collaborated with product and project managers on system design and implementation. Contributed to modernization of legacy systems, improving performance, stability, and operational efficiency.

🎓 EDUCATION

- **Bachelor's Degree in Software Engineering, National Transport University, Kyiv**
Sep 2016 — Jun 2020
- **Master's Degree in Computer Science, National Transport University, Kyiv**
Sep 2020 — Dec 2021

⚙️ COURSES

- **Python Web and Data Science, GoIT**
Aug 2021 — Oct 2022
- **Fullstack Developer, GoIT**
Mar 2023 — Dec 2023
- **AI-agents Pro, Fwdays Academy**
Mar 2026
